

Table of Content

Introduction	10
1. General information	10
1.1 Definition of a Flexible Intermediate Bulk Container (FIBC)	10
1.2 Types and classifications of FIBCs	10
1.2.1 FIBC types for non-dangerous goods as defined in ISO 21898	11
Heavy duty re-usable FIBCs	11
Standard duty re-usable FIBCs	11
Single-trip FIBCs	11
1.2.2 FIBC types by lifting device	11
1.2.3 Electrostatic classification of FIBC types according to IEC 61340-4-4 (Ed. 2.0)	12
1.2.4 Classification according to the UN recommendations for the transport of dangerous goods	12
1.2.5 Design types of FIBCs	12
1.3 Handling devices	14
1.4 Marking/labelling requirements	14
1.5 Certification	15
1.5.1 Certification for non-dangerous FIBCs	15
1.5.2 Certification for dangerous goods FIBCs	15
1.6 Relevant standards for FIBCs	15
2. Selection of FIBCs	16
2.1 General considerations	16
2.2 Inner liner requirements	16
2.2.1 Choosing the correct inner liner	16
2.3 FIBCs for the transport of dangerous goods (UN bags)	17
2.3.1 UN regulation – the “Orange Book”	17
2.3.2 Testing and approval	17
2.3.3 Manufacturing	19
2.3.4 Reconditioning	19

2.3.5	Marking for UN FIBC	19
2.3.6	Requirements for dangerous goods FIBCs	20
2.3.7	Application – classes of dangerous goods	20
2.4	Food contact requirements	22
2.4.1	Legal framework	22
	Regulation (EC) No 1935/2004 – “Framework Regulation”	22
	Regulation (EC) No 2023/2006 – “GMP Regulation”	23
	Regulation (EU) No 10/2011 – “The Plastics Regulation”	23
	Regulation (EC) No 282/2008 – “Recycled Plastics Regulation”	24
	Further relevant resolutions and guidelines:	24
2.4.2	Binding requirements for producers of food contact FIBCs and their upstream suppliers	24
2.4.3	NIAS – Not Intentionally Added Substances/Inadvertently Introduced Substances	25
2.4.4	Clarifications with the suppliers of non-plastic materials	26
2.4.5	Use of recycled plastics for food contact FIBCs	26
2.4.6	Good Manufacturing Practice	26
2.4.7	Declaration of Compliance	27
2.4.8	Traceability	28
2.4.9	Labelling of food contact FIBCs	29
2.4.10	Hygienic manufacturing conditions for FIBCs	29
	General Requirements	30
	Building and hygiene management	30
	Material management	31
	Process and production control	32
2.5	Electrostatic protection	32
2.5.1	Adverse effects of static electricity	33
2.5.2	Electrostatic hazards	33
2.5.3	Static protective FIBCs	35
	Classification	35
	Selection	35

ATEX Directives	36
Labelling	37
2.5.4 Guidance on safe use	38
Earthing	38
Safe use limits	38
Usage, contamination and reconditioning	38
Earthing personnel and other conductors	39
Inner liners for static protective FIBCs	39
2.5.5 Qualification Testing	40
3. Safety checks	41
3.1 Checks for all new FIBCs	41
3.2 Safety checks on standard duty re-usable FIBCs	41
Abrasion	41
Cuts, contusions, and similar damages	41
Ultraviolet degradation and/or chemical attack	42
Damage to coatings	42
3.3 Repair of heavy duty re-usable FIBCs	42
4. Filling and emptying	43
4.1 General safety	43
4.2 Filling	43
4.3 Stability	44
4.4 Emptying	44
5. Transport of FIBCs	46
5.1 Lifting FIBCs	46
5.2 Handling with cranes or hoists	46
5.3 Handling with forklift trucks	48
5.4 Transport on trailers and trucks	50
5.5 Stowage in freight containers	51
5.6 Ship loading	51

5.7	Fallen FIBCs	52
6.	 Stacking and storage of filled FIBCs	53
6.1	Stacking	53
6.2	Stacking height	53
6.3	Storage of FIBCs	54
6.4	Outdoor storage	54
6.5	UV protection – use of UV stabilized FIBC	54
6.5.1	Aspects concerning the service life of FIBCs	55
6.5.2	Selecting the correct UV stabilized FIBC	55
6.5.3	UV stabilization of FIBCs	56
6.5.4	UV testing according to ISO 21898:2004	56
7.	 Repeated use of FIBC and treatment of FIBC waste	57
7.1	Legal Framework	57
7.2	Repeated use	57
7.3	Reconditioning	58
7.4	Recycling	58
7.5	Energy recovery	59
7.6	Disposal	59
	Annex 1	61
	How to use FIBCs – brief overview	61
	Annex 2	62
	Regulation (EU) 10/2011 on plastic materials and articles intended to come into contact with food,	
	Annex IV	62
	Declaration Of Compliance – Sample	63
