Dear Reader,

The European Flexible Intermediate Bulk Container Association (EFIBCA) unites manufacturers, distributors, and key value-chain partners as the voice of the FIBC industry in Europe. In a dynamic market shaped by global supply chains, regulatory changes, and rising demands for sustainability and ethics, EFIBCA provides a stable platform for cooperation, knowledge-sharing, and joint action.

EFIBCA represents the sector vis-à-vis international and European authorities and stakeholders, working to ensure that the specific realities of FIBCs are reflected in legislation and that any resulting requirements are clear, proportionate, and practically achievable for the industry. Sustainability and the European regulatory framework are at the heart of this work, in particular in the context of the EU Packaging and Packaging Waste Regulation (PPWR, Regulation (EU) 2025/40), including future reuse rules from 2030.

Transitioning to a circular economy is another key priority. With the FIBC Design for Recycling (DfR) Standard for polypropylene big bags, EFIBCA has established a common benchmark enabling closed-loop recycling and high-quality recycle for new products. This living standard evolves with advances in design, recycling technology, and infrastructure, supporting the development of circular value chains for FIBCs in Europe.

At the same time, our longstanding commitment to user information, quality, and ethical business practices remains firm. As industries increasingly employ FIBC and the variety of solutions grows, EFIBCA helps users make informed decisions and ensure safe application through practical tools such as the booklet "Questions and Answers Concerning the Use of Flexible Bulk Containers (FIBC)." Initiatives such as the EFIBCA-Q Quality Pledge and the EFIBCA Code of Conduct promote high standards in product quality, safety, working conditions, and fair business practices, helping to build customer trust. EFIBCA thus fosters confidence in FIBCs – to the benefit of our members, FIBC users, and the industry as a whole. Heartfelt thanks go to all members for their continued support. We invite further manufacturers and distributors to join us and speak with one voice for the FIBC industry in Europe.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "C. Noppinger". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Christoph Noppinger, EFIBCA President

EFIBCA Activity Highlights

EFIBCA – Voice of the Flexible Intermediate Bulk Container Industry

Meetings

EFIBCA Annual Meetings

Every year's highlight is the EFIBCA Annual Meeting where all members meet to exchange on current market topics and discuss the association's priority activities. The meeting's social event provides a forum for networking and exchange in a relaxed and informal atmosphere.

EFIBCA Dinner Receptions and Open Meetings

Anyone working in the FIBC industry is welcome to attend EFIBCA's Dinner Receptions and Open Meetings. EFIBCA Dinner Receptions are conceived as the branch's regular kick-off to the packaging trade fair interpack. At Open Meetings, experts give insights into important issues affecting the industry, ranging from new European legislation to market overviews, sustainability, circular economy, to safety and quality, and corporate social responsibility. Both are perfect platforms for information exchange and networking across the FIBC industry.

Initiatives

Circular Economy Working Group

The transition to a circular economy is becoming increasingly important for European companies and will strongly shape future requirements for FIBCs under the Packaging and Packaging Waste Regulation (PPWR). EFIBCA sponsors the Circular Economy Working Group (CEW), in which its member companies work together with a partner association, Eurojute, to address topics that require industry-wide solutions. The CEW focuses on priority areas such as design for recycling, carbon footprint and reuse, and develops joint objectives and recommendations to support the circular use of FIBCs.

Designed for Recycling

EFIBCA has launched a Design for Recycling standard for polypropylene FIBCs that sets harmonised, practical criteria to enable true closed-loop recycling of big bags into new big bags. The programme defines clear design requirements – such as predominantly mono-material PP construction, compatible liners and components, and controlled use of additives and colours – to support high-quality mechanical recycling under current European market conditions. Developed together with our partners and specialised consultants, the standard is conceived as a living document that will be regularly updated as collection systems and recycling technologies evolve. EFIBCA members complying with it can use a protected logo to communicate that their FIBCs are “Designed for Recycling” in a closed loop.

Advocacy

EFIBCA represents the interests of the FIBC industry towards authorities, policymakers and the wider public, enabling its members to speak with one voice in debates that affect the industry. It does so through joint visibility activities, input to secondary legislation and the advocacy of exemptions where they are justified for specific applications, including, where necessary, supporting member companies in court proceedings before European courts.

EFIBCA-Q Quality Pledge

The EFIBCA-Q Quality Pledge aims to raise awareness amongst users of FIBCs about quality and safety standards relevant for different types of FIBCs. FIBC manufacturers and the distributors signing the pledge commit to comply with all specifications listed in the EFIBCA-Q Quality Criteria. Users of FIBC are encouraged to engage with their FIBC supplier on the EFIBCA-Q Quality Criteria and to include these criteria in their supplier audits.

EFIBCA Code of Conduct

More and more customers expect a clear and explicit commitment towards worker rights and ethical business conduct from their suppliers. EFIBCA's code of conduct is a voluntary agreement through which EFIBCA members bind themselves to observe globally recognized ethical standards as well as competition and antitrust law. The EFIBCA Code of Conduct is thus a meaningful way of building trust in customer relations.

Qualified Information on Flexible Intermediate Bulk Containers

Questions and Answers Concerning the Use of Flexible Intermediate Bulk Containers (FIBC)

This brochure is designed as a concise resource for end users of FIBC on key safety-relevant aspects for filling, emptying, transportation, stacking and storing of FIBCs. The brochure is available in print or as a download in English.

EFIBCA also has a long tradition of providing more detailed guidance through comprehensive tools such as the FIBC User Guide for the Safe Use of Flexible Intermediate Bulk Containers, which is currently under review.

Technical Competence

Food Contact Regulation

The EU regulatory framework for food contact materials (FCM) relevant to FIBCs is complex and the requirements are continuously evolving. EFIBCA supports its members by providing a guidance document, the "Guidelines for Practitioners", which covers key regulations such as the Framework Regulation No. 1935/2004, the Good Manufacturing Practice Regulation No. 2023/2006, the Plastics Regulation No. 10/2011 with its amendments and Regulation No. 2022/1616 on the use of plastic recyclate in FCM. EFIBCA also provides dedicated information on specific issues and facilitates access to expert advice on individual FCM-related questions.

Transport of Dangerous Goods Regulation

EFIBCA holds a seat on the board of the International Confederation of Plastics Packaging Manufacturers (ICPP), which represents the global plastic packaging industry at the UN Committee of Experts on the Transport of Dangerous Goods, the body issuing the UN Recommendations better known as the "Orange Book". Through this role, EFIBCA and its members can submit feedback and expert input to ongoing discussions, for example on proposals concerning the use of recycled plastic materials for FIBCs at sessions of the UN Sub-Committee of Experts on the Transport of Dangerous Goods.

Service

EFIBCA informs members regularly about new legislation, standards and technologies as well as FIBC market news. Members have access to exclusive information such as studies, technical and education material in the exclusive Members Section of the website.

Webinars

EFIBCA regularly organises exclusive webinars to keep its members up to date on regulatory, technical and market developments relevant to FIBCs. Recent topics have included FIBC basics, static protective FIBCs, liners, food grade requirements, UN FIBCs for dangerous goods transport, UV stability, the new ISO 21898:2024, alternative materials and key aspects of the EU Packaging and Packaging Waste Regulation (PPWR).

FIBC Import Statistics

EFIBCA regularly compiles and publishes FIBC import statistics. They inform about the value and volume of FIBC imports to the European Union and give a ranking of the top exporting countries to the EU.

EFIBCA Membership Certificates

EFIBCA issues annual membership certificates to all its members. Members are also listed on EFIBCA's homepage www.efibca.com.

Organisation

Council Members

- Christoph Noppinger, Technopac Austria / the Royal NNZ Group (President)
- Christian Leeb, Starlinger & Co. GmbH (Vice President)
- Chris Poole, FPS Flexible Packaging Solutions

Debant Ukraine LLC

- Website: www.debantua.com
- EFIBCA member since July 2016
- Representative at EFIBCA: Vladlen Vavilov
- E-mail-address: vlad.n.vavilov@gmail.com
- Products and services: Designing and manufacturing full range of FIBCs; PP fabric, PP yarn and loops production. ISO 9001 : 2015 certified company.
- Location of head quarters and production sites: Kharkiv, Ukraine.
- Markets: Ukraine, Europe
- Number of employees: 100+

History of Company:

September 1996, that was the beginning, when Ukrainian office of Debant Group (Turkey) company was opened and an ambitious goal to become one of the leading Ukrainian manufacturers of high quality packaging was set. And the goal was reached, from the beginning and till 2025, Debant Ukraine gradually mastered the full production cycle, from PP yarn, PP webbing, PP fabric production till designing and manufacturing full range of FIBCs. Debant Ukraine was a fast-growing and dynamic company, specializing on production of polypropylene industrial packaging for transportation and storage of bulk materials for more than 20 years. As of today, due to a missile and bomb strike by the aggressor, the company has suspended operations for short period of time. Thanks to a professional team and our perseverance, two months later, we were able to restart sewing production, and we are now successfully restoring weaving workshop. By the end of 2026, we plan to restore our production to full capacity.

And in the future, after the workshops are fully restored, we plan to relocate and significantly increase production capacity.

*Mr. Vladylen Vavilow,
Debant Ukraine LLC*

ELEMENT INTERNATIONAL BELGIUM

- Website: www.element-trade.com
- EFIBCA member since 2025
- Representative at EFIBCA: Mr. ERHAN ETIZ

FPS Investments bv.

- Website: www.fps.com
- EFIBCA member since 1990
- Representative at EFIBCA: Chris Poole
- E-mail-address: chris.poole@fps.com
- Products and services: 4-Loop and 1-Loop FIBCs, Container Liners, Flexible Films, Foldable Containers, FlexiGreen; FIBC Reconditioning
- Location of head quarters and production sites: Headquarters: Amstelveen NL, Production Sites, Turkey, China, Vietnam, Mexico, Romania, Ukraine, UK, France, Germany
- Markets: Food & Nutrition, Chemicals, Pharmaceuticals, Fertilizer, Construction, Mining & Minerals, Battery Powder, Waste Management & Recycling, Fish Feed, Seed
- Turnover: 350M USD
- Number of employees: 4000
- Other: Closed-Loop Recycling Hub & FIBC Reconditioning (Rebu)

History of Company:

In 2010, Greif and Al-Dabbagh Group (ADG) undertook a 50/50 Joint Venture to establish the FPS business to become the market leader within FIBCs. On April 1st, 2022, the two shareholders completed the transition to the single-owner ADG. Our team is inspired by this new single ownership and is working passionately with our customers to further develop our mutual partnership. FPS Flexible Packaging Solutions provides FIBCs or Big Bags, container liners, and other flexible packaging for chemical, food, pharmaceutical, agriculture, and many other sectors. The world's most important products have traveled safely around the world in FPS industrial packaging. We are committed to being your productivity partner by bringing efficiency to your supply chain through a comprehensive and innovative product

portfolio. With over 4,000 colleagues in 16 countries, 13 production plants and 19 sales locations we have an extensive and integrated global manufacturing and distribution network providing technical expertise and local customer service. We believe that we have a great chance to change our future and to leave a better world for our communities and stakeholders we impact. We focus on our people, strong through diversity, committed to sustainability, and empowered by continuous improvement in all aspects of our work.

Masterpack Group b.v.*

Mewar Polytex International B.V.

- Website: www.mewarpolytex.com
- EFIBCA member since 2025
- Representative at EFIBCA: Marcus Schmidt
- E-mail-address: Marcus.schmidt@mewarpolytex.com
- Products and services: All Types of FIBC Bags, small bags, Geotextile, technical textile, etc.
- Location of head quarters and production sites:
Head Quarter – Udaipur, Rajasthan, India.
Production site: Udaipur, Himmatnagar (India)
- Markets: USA, Mexico, Europe, UAE, Australia, New Zealand, India
- Turnover: Approx 100 million USD Per Annum of the whole Mewar Polytex group
- Number of employees: 4000 direct and contracted employees
- Other: Mewar Polytex Group is an established manufacturer of PP and HDPE woven fabrics, geotextiles, and industrial packaging products, with integrated production facilities and a monthly capacity exceeding 5,000 metric tonnes. The Group supplies to international markets, operating with standardized manufacturing processes, quality systems, and a focus on continuous technical improvement.

History of Company:

Founded in 1979, Mewar Polytex Group began with Mewar Polytex Ltd., pioneering the use of polypropylene (PP) in woven sacks to overcome strength and performance limitations of traditional polyethylene packaging. The Group expanded steadily, went public in 1995, and entered European export markets in the 1990s through a strong focus on quality and customer service. In 2005, a joint venture with a U.S.-based engineered textile manufacturer and the establishment of a North American office marked a key global milestone. Today, through Mewar Polytex International BV,

the Group serves international markets with advanced PP/HDPE fabrics, geotextiles, and packaging solutions, supported by continuous investment in technology.

- Markets: Mainly, Spain and South America.
- Turnover: 5M€
- Number of employees: 15

History of Company:

MULTISAC is a leading company in sales, distribution and manufacturing of FIBCs (Big Bags) and Sacks (Small Bags) in Spain. Since 1944 and for more than 80 years, we have been helping our customers by manufacturing and marketing FIBCs (Big Bags) and Sacks (Small Bags) of all kinds. We have supplied more than 18,000 customers of all sectors and sizes. We provide solutions for any requirement, delivering high quality, safety tested and certified items. **BENEFITS OF RELYING ON MULTISAC** 1.- Large stock on site for express delivery. 2.- The largest variety of high-quality and high-resistance products. 3.- Advice and sales assistance with more than 80 years of experience. 4.- Products customization according to any requirement. 5.- Customer's warehouse management to avoid stock-outs. 6.- Competitive prices. **FASTER DELIVERY** Multisac has a team of professionals with great experience in the sector and all the knowledge about FIBCs and Sacks and all its variants. We have warehouses with large stocks and diversity of products, sizes and other characteristics to be able to supply immediately any quantity of different types of bags, big bags and fabrics. We can quickly deliver small quantities or organize large deliveries for national or international destinations. **PERSONALIZED SERVICES AND SUPPLIES** Multisac offers different customi-

zation options: Configuration: Fully customized manufacturing of any Big Bag and Sacks in terms of format, measurements, weight, resistance, accessories, colors and specific characteristics of each client. Printing: Two flexo-printing machines with which we can print on the bags and some Big Bags up to three colors per side to faithfully reproduce customer's anagrams and logos, or describe in detail the characteristics of his products. Complements: Placement of polyethylene liners. In addition to having a wide variety of bags with liners in stock, we can insert liners in regular bags quickly. Specialization: On some special occasions, our customers have needed combinations of up to two and three bags or composite elements to meet their requirements. We can increase the degree of customization by performing some of these manipulations at the factory of origin, such as printing in more than three colors or even with photographic quality finishes.

*Mr. Albert Aguilar
Serramià, MultiSac S.L.*

Nebig Verpakkingen BV

- Website: www.nebig.com
- EFIBCA member since 2011
- Representative at EFIBCA: Lucien Scheers, CEO
- E-mail-address: info@nebig.com
- Products and services: Nebig provides high-quality flexible industrial packaging solutions for the food, feed, chemical and agricultural industries. Our offering includes FIBCs, industrial paper bags, woven PP/BOPP bags, jute bags and container liners. We work with an independent sourcing model and certified European warehousing, ensuring consistent quality and reliable availability. By collaborating closely with customers and producers, we help improve packaging performance across the supply chain, enhancing efficiency, safety and product protection.
- Location of head quarters and production sites: Head office in Opmeer (NL); local teams in NL, FR, DE, DK and PL; certified warehousing hubs across Europe; long-term audited production partners in Europe, Turkey and India.
- Markets: Active in 31 countries, with a strong focus on Europe.
- Turnover: Approx. €40–45 million
- Number of employees: 65

History of Company:

Founded in 2000, Nebig has grown into one of Europe's leading distributors of flexible industrial packaging. We are known for transparency, expertise and long-term partnerships. As a committed supply-chain partner, we focus on adding value beyond the product, by strengthening relationships, improving processes and contributing to resilient, reliable and responsible packaging chains.

- Turnover: 13 M€
- Number of employees: 53
- Other: Certified ISO 9001 & 45001 – Silver Medal ECOVADIS

History of Company:

Since launching our first ultrasonic devices in 1975, we have been designing reliable cutting and welding solutions for PP tapes and plastic films. Ultrasonic technology ensures clean, strong, and hygienic edges without burning or over-thickness, making it the preferred solution for PP-woven fabrics in FIBC and bag production. We provide on-loom and off-line ultrasonic equipment for:

- Edge or central cutting
- Cross and spout cutting
- Ultrasonic welding or cutting
- Chain-stitch cutting

Our state-of-the-art systems deliver efficient, precise, and sustainable processing-enhancing quality and simplifying all final make-up operations.

*Mr. Salih Sütcü Resim,
Filpa Ambalajve Dis Tic A.S.*

History of Company:

Gujarat Craft Industries Limited began its journey in 1984, at a time when India's woven packaging industry was still evolving. Founded with a clear vision to build a reliable and quality-driven manufacturing company, GCIL started with PP and HDPE woven products and steadily grew by investing in technology, people, and process control. The early years were marked by a strong focus on consistency and export readiness, which helped the company earn the trust of international buyers. This steady progress led to a major milestone in 1992, when Gujarat Craft Industries Limited was listed on the Bombay Stock Exchange (BSE) a reflection of its transparency, credibility, and long-term commitment to growth. Over the decades, GCIL evolved into a fully vertically integrated manufacturer, expanding its product portfolio to include FIBCs (Big Bags), PP woven sacks, PE tarpaulins, woven fabrics, geomembranes, and specialty industrial packaging. With modern manufacturing facilities, ISO 9001:2015 certification, and a strong export presence across Europe, the Americas, Africa, and Asia, the company built a reputation for quality, reliability, and ethical operations. Today, Gujarat Craft Industries Limited continues to grow with a forward-looking approach-embracing sustainability, recycling initiatives, and continuous improvement-while remaining rooted in the values that shaped its journey for over four decades.

History of Company:

Meghna Bulk Bag Industries Limited (MBBIL), is a sister concern of Meghna Group of Industries (MGI), Bangladesh. MGI represents an enterprise and brand with 50 years of national and global experience. It currently operates more than 54 industrial units, houses over 50,000 employees, 6,650 distributors, and 15,000 suppliers under its umbrella, and achieves an annual turnover of approximately \$3.0 billion. MGI has been in the woven sack business since 1999 and the current sales volume is 12-13 million small sacks per month, in the local and international markets. As part of the capacity expansion, Jumbo Bag/FIBC's production started in 2017 under the name of Unique Cement Fibre Industries Ltd (UCFIL) & Later another plant named Meghna Bulk Bag Industries Limited (MBBIL) was developed to increase the production capacity. The current focus of MBBIL is to export high-quality FIBCs by meeting the quality requirements of valued customers. MBBIL consists of a vertically integrated production facility

with a well-equipped quality lab to conform to the quality requirements. MBBIL is an ISO 9001 & ISO 14001 & FSSC 22000 & SEDEX certified company. MBBIL is a full member of the prestigious EFIBCA since 2018.

- Markets: Europe, USA, South America, UAE, Australia, NZ, Japan, Korea etc
- Turnover: 10 Million USD
- Number of employees: 500

History of Company:

India's Umasree Texplast partners with Brazil's Packem and produces 100% sustainable FIBC / Jumbo Bags from recycled PET/PCR. The project gives a massive enhancement to India's sustainability quotient and adds a jewel to the crown of the MAKE IN INDIA global campaign. The project completely reimagines Big Bag manufacturing, makes India self-reliant, and positions it as a hub for exports in this segment. It also reimagines the way plastic and plastic waste have been looked at for decades; the technology and methodology applied are among the unique innovations the country witnesses in the domain of sustainable bulk packaging. Along with achieving technological advancement, the project redefines the role of a corporation in bringing wider ecological and social benefits.

History of Company:

Sinobangla Industries Limited, founded in 1996 as a China-Bangladesh joint-venture company. Since then, we have grown to become the largest manufacturer and exporter of FIBCs (big bag) and woven polypropylene (WPP) bags in Bangladesh. The aim of the Company has always been, and still remains, to produce quality products meeting complete customer satisfaction. Efforts to meet this aim have resulted in the establishment of a vertically integrated production system. From Polymer extrusion to weaving, coating, printing and sewing, this system provides the needed flexibility to meet varied requirements of the customers. As a testament to our enduring dedication towards quality, Sinobangla Industries Ltd. has achieved the ISO 9001 and OHSAS 18001 and in the process of achieving ISO 14001, FSSC 22000 and SA 8000 certifications. We are also the only member of both the prestigious EFIBCA (European Flexible Intermediate Bulk Container

Association) & FIBCA (Flexible Intermediate Bulk Container Association USA) from Bangladesh.

Starlinger & Co Gesellschaft m.b.H.

- Website: www.starlinger.com
- EFIBCA member since 2008
- Representative at EFIBCA: Mr. Christian Leeb
- E-mail-address: sales.lb@starlinger.com
- Products and services: FIBC tape extrusion and weaving machinery for PP and PET
- Location of head quarters and production sites: Vienna and Weissenbach, Austria
- Markets: Worldwide
- Number of employees: 800

History of Company:

Founded in 1835, Starlinger & Co Gesellschaft m.b.H. has been owned and managed by the Starlinger-Huemer family for three generations. With decades of experience in the manufacture of textile machinery, Starlinger constructed its first circular loom for PP tapes in the early 1970's; from then on, the company grew and started to export its products to more and more countries. Since the 1990s, Starlinger has been supplying the entire range of machines for the production of woven plastic bags and FIBCs. With the establishment of the company divisions Starlinger recycling technology in 2000 and Starlinger viscotec in 2005, the foundation for sustainability and circular economy in plastic packaging were laid. In 2025, Starlinger celebrated its 190th anniversary.

Texene LLC

- Website: www.CROHMIQ.com & www.texene.com
- EFIBCA member since 2004
- Representative at EFIBCA: Dr Paul Holdstock
- E-mail-address: pholdstock@texene.com
- Products and services: CROHMIQ® Static Protective Type D FIBC Fabrics, standard FIBC fabrics and other technical textiles
- Location of head quarters and production sites:
HQ: Miami Lakes, FL, USA; European Office: Manchester, UK; Manufacturing Locations: USA, Mexico, Turkey, India, Indonesia, Thailand
- Markets: Worldwide
- Other: Texene is an Associate Member of US FIBCA

History of Company:

Texene traces its history back to 1971 when polypropylene fabric production was established as an operating division of Exxon Chemical Company. In the 1990's, innovation and customer focussed product development by Exxon scientists and engineers resulted in the invention of CROHMIQ® static protective FIBC fabric, the world's first Type D FIBC fabric. In 2007, the industrial fabrics division, including FIBC fabrics, was divested to form Texene LLC as an independent company. Today, CROHMIQ® fabric production remains Texene's core business. Texene is recognized globally as the leader in Type D FIBC fabric technology.
